

PRESS RELEASE

## Vivago's unique wellbeing and safety solution with MOBILE app and revolutionary Lean e-Health Concept were introduced at UK e-Health week, London

*Vivago was attending the UK e-Health week in London 19-20 April. At the event Vivago's CEO, Mrs. Maria Lavonen, gave a speech introducing the new and innovative solutions and concepts from Vivago.*

*Vivago offers innovative solutions that ensure the wellbeing of elderly and make their lives safer. Vivago CARE watch monitors users' movements, activity level, sleep and gives automatic alarm if needed. The monitored movement is adapted to individual information. The circadian rhythm, activity and sleep information provides holistic view of persons wellbeing. Vivago supports the mission of living safely and receiving the right care, in the right place at the right time.*

### **With Vivago MOBILE app care givers can follow-up customers wellbeing, task prioritisation and alarm reception regardless of their location**

"Vivago MOBILE gives end-users and relatives the possibility to check wellbeing information via a mobile device or a pc browser. Nurses can receive alarm information regardless of their location and all customer information is easy to access", says Mrs. Maria Lavonen, CEO of Vivago.

Vivago MOBILE lists the customers based on their alarm and wellbeing status which helps care givers to prioritise their tasks. Application gives the possibility to check the customer's wellbeing information easily – regardless of the location and time. Application informs when the customer is sleeping, what the activity level is and whether the customer has gone out. All alarms are received by the Vivago MOBILE.

### **Vivago's revolutionary Lean e-Health Concept brings unique wellbeing information enabling remarkable savings in rehabilitation and home care**

"Vivago's unique technology and patented solutions bring lean thinking and working processes into social and health care. Vivago's technology enable the revision of care processes and real time, objective measurement of care results ", says Mrs. Lavonen.

Vivago's solution enable faster rehabilitation from hospital care to home care and wellbeing monitoring will be used through out the whole process from hospital recovery period to rehabilitation and home care. Exact analytics help to select right timing for discharge. Solution follows to home and monitors wellbeing

information with Vivago DOMI, a smart care phone with functionalities like real-time wellbeing measurement, automatic alarming, traditional nurse call system and self-diagnostics. Mobile nursing team have remotely always real-time information on customers wellbeing and they can react immediately to changes.

“Vivago’s solution means in practice, 60% faster rehabilitation from hospital to home care and 1800€ savings per patient. Vivago’s preventive information enable longer stay at home care. Wellbeing information also helps to avoid need of acute care, because real-time monitoring helps to provide needed care before situation is worsened and acute care is needed. This means savings of 250€ each day in acute care”, adds Mrs. Lavonen.

“Vivago Solution will bring two main benefits, increase the quality of care and create remarkable savings”, summarizes Mrs. Lavonen in her speech. Customers can live longer at home and feel safe with the help of Vivago solutions.
