## Vivago MOBILE application – Always with you

**Vivago MOBILE brings together care givers at home and in institutions. It serves relatives, personal assistants, nurses, care planners, GPs and alarm centers.**

- Vivago MOBILE is an application for nurses that enables their customers wellbeing follow up, task prioritization and alarm reception.
- Vivago MOBILE follows the nurses where ever they go and the information is easy accessible.
- Customer's wellbeing information informs when the customer has woken up, what the activity level is, is the customer sleeping or is he outside his/her home.
- Vivago MOBILE supports also communication between nurses and relatives. Notes can be shared both by nurses and relatives.

Vivago MOBILE gives end-users and relatives the possibility to check wellbeing information via a mobile device or pc browser.

**Vivago MOBILE gives the possibility to check:**

- Customer information
- Wellbeing information
- Alarm information
- Activity
- When the person is sleeping, active, gone out and making an alarm
- Possibility to communicate with nurses via short notes
