

PRESS RELEASE

Rehabilitation hospital of Pori renewed the services with analytics and wellbeing information

Vivago has won the care phone competitive bidding in the rehabilitation hospital of Pori. Pori will take advantage of the Vivago solutions, analytics and wellbeing information in the entire city. Good experience and significant cost savings in the rehabilitation hospital confirmed the choice of Vivago solutions also to the home care side.

The rehabilitation hospital of Pori brings services to home – safely and efficiently

The rehabilitation hospital of Pori expands the service offering even further with the acquisition of Vivago Domi smart care phones and other Vivago solutions. Vivago LOCATE tracker provides additional security to elderly who move outside of their own home. Vivago's partner, VideoVisit Ltd provides virtual services with eCare solution which provides medical and rehabilitation services directly at home. In addition to this, with e-Care service a virtual video connection can be opened directly to home. It is important that intelligent technology which is provided at home works well as a whole. Virtual video connection in addition with Vivago's wellbeing report gives a clear picture of the wellbeing of elderly person.

Intelligent technology gives added value

Co-operation between Vivago and Pori provides an accurate picture of the wellbeing of elderly people living at home. Real time monitoring provides safety and gives the possibility to react when changes in wellbeing occur. Reacting to changes in the wellbeing supports also the privacy and self-reliance of the elderly.

As a result, the duration of rehabilitation periods in Pori was shortened and rehabilitation phase became more efficient. Feeling of safety was also significantly strengthened.

City of Pori has also achieved significant cost savings. Vivago solution means in practice significantly faster rehabilitation from hospital to home care and hundreds of euro's savings per patient. Vivago's wellbeing information also helps to avoid need of acute care, because real-time monitoring helps to provide needed care before situation is worsened and acute care is needed.

Vivago solution brings planning and timely care to home care visits. Nursing staff has the possibility to concentrate to the most important – taking care of the customer's wellbeing.
